Total Net Proceeds/Use of Proceeds:

The net proceeds from this offering will be approximately \$130.65 million, after deducting the underwriters' discount and estimated offering expenses, assuming the underwriters do not exercise their option to purchase additional Notes to cover overallocments. If the underwriters exercise their option to purchase additional Notes to cover overallocments, the net proceeds from the offering will be approximately \$145.20 million, after deducting the underwriters' discount and estimated offering expenses.

The Issuer expects to use (x) \$23.00 million of the net proceeds from this offering (or \$25.50 if the underwriters exercise their overallocation option in full) to acquire the government securities that will be pledged for the exclusive benefit of the holders of the Notes, as described under "Description of the Notes—Interest Escrow" in the preliminary prospectus supplement for this offering and (y) the remaining net proceeds from this offering for the procurement and launch of the Issuer's second-generation satellite constellation and related ground facilities and other general corporate purposes.

Concurrent Transactions:

Concurrently with, and from time to time after this offering, the Issuer is offering up to 36,144,570 shares of its common stock by means of a separate prospectus supplement in an offering registered under the Securities Act of 1933. Merrill Lynch & Co., one of the underwriters of this offering, will act as the underwriter for the common stock offering. The shares of the Issuer's common stock to be sold in that offering will be lent to Merrill Lynch International, or MLI, an affiliate of Merrill Lynch & Co., by the Issuer pursuant to a share lending agreement among the Issuer, Merrill Lynch & Co. and MLI. MLI will receive all of the proceeds from all such common stock offering and lending transactions. See "Description of Share Lending Agreement" in the preliminary prospectus supplement for this offering. The Issuer will not receive any of the proceeds from such common stock offering. The delivery of such shares of the Issuer's common stock under the share lending agreement is contingent upon the closing of this offering, and the closing of this offering is contingent upon the delivery of the borrowed shares of the Issuer's common stock pursuant to the share lending agreement. The Issuer expects that delivery of the Issuer's common stock will be made on or about the Settlement Date.

21,936,020 of the up to 36,144,570 shares in the common stock offering will be initially offered at \$4.15 per share and the remaining shares of the Issuer's common stock will be subsequently offered and sold from time to time at prevailing market prices at the time of sale or at negotiated prices in transactions including block sales, in the over-the-counter market, in negotiated transactions, or otherwise. During such time, MLI, or its affiliates, are also likely to purchase a corresponding number of shares of the Issuer's common stock in secondary market transactions.

We do not expect the deemed underwriter's compensation as described under "Underwriting" in the preliminary prospectus supplement for the common stock offering to exceed, subject to certain interest rate, stock price and other assumptions, approximately 3.25% per share (based on the offering price) rather than approximately 2.5% as previously indicated in the preliminary prospectus supplement for the common stock offering.

Adjustment to Conversion Rate upon a Make-whole Fundamental Change:

The number of additional shares of the Issuer's common stock by which the applicable base conversion rate for the Notes will be increased for conversions in connection with a make whole fundamental change will be determined based on the date on which the make whole fundamental change becomes effective (the "effective date") and the price (the "stock price") paid, or deemed paid, per share of the Issuer's common stock in the make whole fundamental change, as set forth in the table below:

Effective Date
Make Whole Premium (Increase in Applicable Base Conversion Rate)

The actual stock price and effective date may not be set forth in the table above, in which case:

- If the actual stock price on the effective date is between two stock prices in the table or the actual effective date is between two effective dates in the table, the amount of the base conversion rate adjustment will be determined by straight-line interpolation between the adjustment amounts set forth for the higher and lower stock prices and the earlier and later effective dates, as applicable, based on a 365-day year;
- If the actual stock price on the effective date exceeds \$100.00 per share of the Issuer's common stock (subject to adjustment), no adjustment to the base conversion rate will be made; and
- If the actual stock price on the effective date is less than \$4.15 per share of the Issuer's common stock (subject to adjustment), no adjustment to the base conversion rate will be made.

Notwithstanding the foregoing, the base conversion rate shall not exceed 240.9638 shares of the Issuer's common stock per \$1,000 principal amount of the Notes, subject to adjustment in the same manner as the base conversion rate as set forth under "Description of the Notes—Conversion Rights—Base Conversion Rate Adjustments" in the preliminary prospectus supplement for this offering.

If any information contained in this Pricing Term Sheet is inconsistent with information contained in the prospectus or preliminary prospectus supplement relating to the offering of the Notes, the terms of this Pricing Term Sheet shall govern.
